PRISTINE POOLS

SMARTER POOL EQUIPMENT

Selected for performance, simplicity and long-term value

THE COMPLETE EQUIPMENT PACKAGE

Three proven products working together for a cleaner, easier pool.

P320XT

VARIABLE SPEED PUMP

SAVE ON RUNNING COSTS

HALO CHLOR

SANITATION + AUTOMATION

CONTROL NOW. EXPAND LATER.

XC150 / XC250

CARTRIDGE FILTER

CLEAR WATER, EASY CARE

EFFICIENCY. FILTRATION. AUTOMATION.

A thoughtfully matched system designed to reduce effort without compromising performance.

Installed and supported by Pristine Pools.

ASTRALPOOL

Premium equipment by AstralPool

WHY THESE THREE?

A simple, capable foundation for everyday pool ownership

P320XT Variable Speed Pump

SAVE MONEY EVERY DAY

The only variable speed pump in our standard range. It adjusts speed to suit the job, avoiding the cost of running at full power when it is not needed.

- Potentially uses up to 90% less energy than a conventional single-speed pump.
- Quiet, efficient circulation with extra power available for demanding tasks.
- Connects with Halo for coordinated speed control.

Halo Chlor + Connect System

EASY NOW. EXPANDABLE LATER.

Halo combines high-performance chlorination with an intuitive touchscreen and smart control. Start with the essentials, then add capability as the pool evolves.

- Monitor and control the pool through the Halo ChlorGo app via Bluetooth or Wi-Fi.
- Expandable control for compatible pumps, heating, lighting, valves, water features and more.
- Optional pH and ORP sensors with Halo Doser can automate water chemistry.

XC150 + XC250 Cartridge Filters

STRONG FILTRATION. STRAIGHTFORWARD CARE.

The two sizes we sell provide dependable filtration with a compact design and no backwashing. The right model is selected to suit the pool and required flow rate.

- Cyclonic action moves debris away from the element to help reduce clogging.
- Easy cartridge access and cleaning.
- No backwash cycle - saving water and simplifying maintenance.

One connected equipment package. One team to install and support it.

Final equipment selection is confirmed for your pool design, hydraulics and intended use.
