PRISTINE POOLS

HEAT YOUR POOL SMARTER

More swimming. Greater comfort. Smarter energy use.

THREE WAYS TO EXTEND YOUR SWIM

Choose the solution that best fits your space, priorities and budget.

AES TDi

TOP-DISCHARGE INVERTER

MADE FOR TIGHT SPACES

EVO FORCE-Ai

AI FULL INVERTER

OUR MAIN RECOMMENDATION

EVO FUSION-i

FULL INVERTER

BUDGET CONSCIOUS

MORE MONTHS. MORE SWIMS. MORE VALUE.

A correctly sized heat pump can extend your season efficiently and reliably.

Selected, sized and supported by Pristine Pools.

Australian Energy Systems

EvoHeat Hot H₂O Technology

Heating technology from Australian Energy Systems and EvoHeat

WHICH HEAT PUMP SUITS YOU?

Three recommendations. One correctly sized solution.

AES TDi Ultra Inverter

THE PROBLEM-SOLVER FOR TIGHT SPACES

A practical niche option when conventional side-discharge clearance is difficult or space is limited.

- Vertical top discharge with 270-degree air intake.
- Full inverter operation with heating and cooling.
- Compact placement flexibility without sacrificing performance.

EvoHeat Force-Ai

OUR MAIN RECOMMENDATION

A premium year-round system that actively manages heating demand for comfort, efficiency and lower running costs.

- AI uses temperature and local weather data to anticipate demand.
- Solar Smart mode, intelligent timers and built-in 4G cloud control.
- Full inverter performance with ultra-quiet operation.

EvoHeat Fusion-i

FOR THE BUDGET-CONSCIOUS BUYER

A cost-conscious way to extend the swim season while retaining efficient full-inverter heating and useful everyday controls.

- Heating and cooling with stepless full-inverter technology.
- Built-in timers, silent mode and automatic defrost.
- Optional Wi-Fi control; model selected to suit the pool.

CORRECT SIZING MATTERS

Pool volume, location, wind exposure, cover use and desired swim season all affect the right model. Pristine Pools will size the system for your property and goals.

Final performance and running costs depend on site conditions and usage.
