CHOOSE YOUR WATER EXPERIENCE

Three proven approaches to clean, inviting pool water.

THREE WAYS TO ENJOY YOUR POOL

Compare the feel, technology and ownership experience that suits you.

ENVIROSWIM ES3

FRESH-WATER SYSTEM

FRESH-WATER ALTERNATIVE

HALO MINERAL

MINERAL WATER + AUTOMATION

OUR GO-TO CHOICE

HALO SALT

SALT WATER + AUTOMATION

SIMPLE + FAMILIAR

ONE POOL. THREE DIFFERENT EXPERIENCES.

All three can deliver clear water. The best choice depends on how you want it to feel and operate.

Recommended, installed and supported by Pristine Pools.

Sanitation systems from Enviroswim and AstralPool

WHICH WATER SYSTEM SUITS YOU?

The practical difference between three popular choices.

Enviroswim ES3

A SPECIALISED FRESH-WATER ALTERNATIVE

For customers specifically seeking a low-salt, non-chlorinator approach and who are comfortable with a more specialised water-care system.

- Combines electronic oxidation, copper/silver ionisation and ultrasonics.
- Operates at a low total dissolved solids range of 1,000-1,500ppm.
- Requires regular water balance and copper-level monitoring.

Halo Mineral

OUR GO-TO RECOMMENDATION

The best balance of premium water feel and Halo convenience. Mineral blend is used in place of ordinary pool salt while Halo manages sanitation and connected control.

- Softer-feeling mineral water with familiar chlorinator operation.
- Bluetooth and Wi-Fi control through the Halo ChlorGo app.
- Expandable to pumps, heating, lighting and automated chemistry.

Halo Salt

SIMPLE, FAMILIAR AND COST-EFFECTIVE

The straightforward Halo option for customers who prefer a conventional saltwater pool and lower-cost salt replenishment.

- Uses ordinary pool salt to generate chlorine for sanitation.
- The same intuitive Halo touchscreen and app experience.
- Retains Halo expansion options for broader pool automation.

THE SYSTEM IS ONLY PART OF THE RESULT

Correct setup, circulation, filtration and water balance are essential whichever option you choose. Pristine Pools will explain the ownership requirements clearly.

Final recommendation is confirmed for your pool, preferences and maintenance expectations.
